

AFP GROUP EXPANDS NETWORK WITH NEW INDIA OFFICE

Hong Kong, XXth September 2009 – Hong Kong-headquartered taxation and wealth management specialists AFP Group, has announced the opening of its newest office in New Delhi, India. The move is the latest step in the Group's progressive expansion across the region and follows the recent opening of its offices in Singapore.

Serving both resident and non-resident businesses and individuals, the new AFP India office will offer professional advice and solutions on all aspects of domestic and foreign financial services. The Group's key services include corporate and fiduciary, tax advisory, and trade and accounting; providing a solid basis through which clients can ensure, amongst other things, efficiencies for their corporate and personal taxation liabilities worldwide.

Says Matthew Corbin, Managing Director of AFP Advisory Services India Private Limited, "India is a huge market that is to date relatively under developed domestically in terms of the availability of modern wealth management and financial advisory services.

"For people and companies looking to invest in India, the opportunities can be phenomenal, but they need to be aware of the potential pitfalls. Equally, many domestic Indian clients have also had bad personal experiences of investing and/or starting their own businesses outside India. We will be there to help both parties."

Matthew is a professional trustee and in addition to his duties in India heads up AFP Group's marketing and business development globally, splitting his time between India and Hong Kong. Matthew is also a Director for all fiduciary services within the AFP Group.

"India is a growing market unlike any other in Asia and stands to be a substantial regional and global powerhouse in the coming years," says Pranav Khanna, Chief Operating Officer of AFP Advisory Services India Private Limited. "I have every confidence that the market entry and financial services solutions that AFP offers to both professionals and corporates will play its part in contributing to that growth story."
